ABSTRACT

This yearbook presents statistical information about the state of New York and its population as well as information about the five boroughs of New York City. The 39 tables and 3 figures in Section J describe education in New York state in the 1990s and into 2002. These tables contain information that makes it possible to compare these statistics with those of previous years and from other states. Tables are grouped into these categories: (1) fall enrollments in public and nonpublic elementary and secondary schools; (2) public school finances and professional positions; (3) high school graduates, college entrants, and dropout rates; (4) enrollments, degrees granted, and expenditures by institutions of higher education; (5) State University of New York enrollments, degrees granted, and employees; (6) tuition assistance, student loans, scholarships, and awards; (7) educational attainment; (8) libraries, archives, and museums; (9) support for the arts; and (10) public television and broadcasting. Data re generally for the years 1994 to the present, with emphasis on the later years, and some brief trend information for years before 1994. (SLD)

1 The local units charged with the administration of schools in New York State may be placed in three categories:

a The "common school district" dates from 1812 and is limited to providing education through the eighth grade. The district was originally set up in 1812 to render "common schooling" or the three Rs. The district was and for the most part has continued to be small in area. Some common districts have consolidated but continue to function as common school districts. The district is governed by a sole trustee or a board of three trustees.

b City school districts are subdivided into two fiscal categories. School districts of cities of population under 125,000 are fiscally independent. School districts of the "Big Five" cities (population over 125,000) are fiscally dependent and have boundaries which are coterminous with the city.

c The "union free district," unlike the common district, may provide high school services when granted a charter by the Board of Regents, although some union free districts provide elementary school services only and in that regard function quite like common districts.

Central school districts and central high school districts, while organized under special provisions of the law, function thereafter as union free districts and may, therefore, properly be put in the category of union free districts. When a union free or central district employs its own superintendent of schools, it is called an independent village superintendency district. Its operation, however, is not changed materially.

2 Districts are counted annually in September.

3 Includes "Big Five" cities (New York, Buffalo, Rochester, Syracuse, and Yonkers), other smaller independent city districts and city central districts.

4 Includes village central school districts.

5 The supervisory district serves in an intermediate position; that is, between the State and the local district. The geographical extent of the supervisory district is determined by a grouping of towns. The administrative officer of the supervisory district is the district superintendent whose qualifications by law must be the same as those of the city and village superintendents. The district superintendent serves as both a local officer and a State officer.

6 BOCES (Boards of Cooperative Educational Services) are service organizations created by law to do for a district that which it cannot do by or for itself because of size, financial burden, etc. BOCES are not included in the "Total Districts" column because they function as providers of services to regional groups of school districts.
